

The King Performance

4 LEDs per square
indicate next move

40 cm in size with wooden figures

Connection to *ChessLink*

Chess960 integrated

*The most personal and
exciting partner you have
ever had!*

With this chess computer you play like a king! The new *The King Performance* contains the legendary chess program *The King* by Johan de Koning.

With its classic, harmonious design in a 40 x 40 cm real wood frame, it is the perfect size for playing at home. The handmade real wood figures round off the high-quality impression perfectly. The chessboard in wood look offers with 81 LEDs for move indication and the new HighSensitive sensor technology highly comfortable gaming fun.

In addition, there is an opponent waiting for you, who offers completely new and interesting challenges with his very active, risk-taking, sometimes even spectacular playing style. You won't play against any chess computer in a more human and emotional way!

The function for saving different opponent personalities allows you to configure your own „personal king“ step by step. For the first time, the popular Chess960 game has been integrated according to the official FIDE rules.

In addition, the new performance device also offers the connection to the ChessLink, so that you can play on the sensor board also against chess apps and even online against chess partners around the world.

- » Chess computer with the legendary program *The King* by Johan de Koning
- » Real wood housing with illuminated display (54 x 27mm)
